

Opportunities behind e-Infrastructure and Scientific Data for Education

Krzysztof Kurowski

RDA Meets researchers in Poland, Warsaw 1st February 2017

National Research and Educational Network in Poland

HPC Centers
& Storage facilities

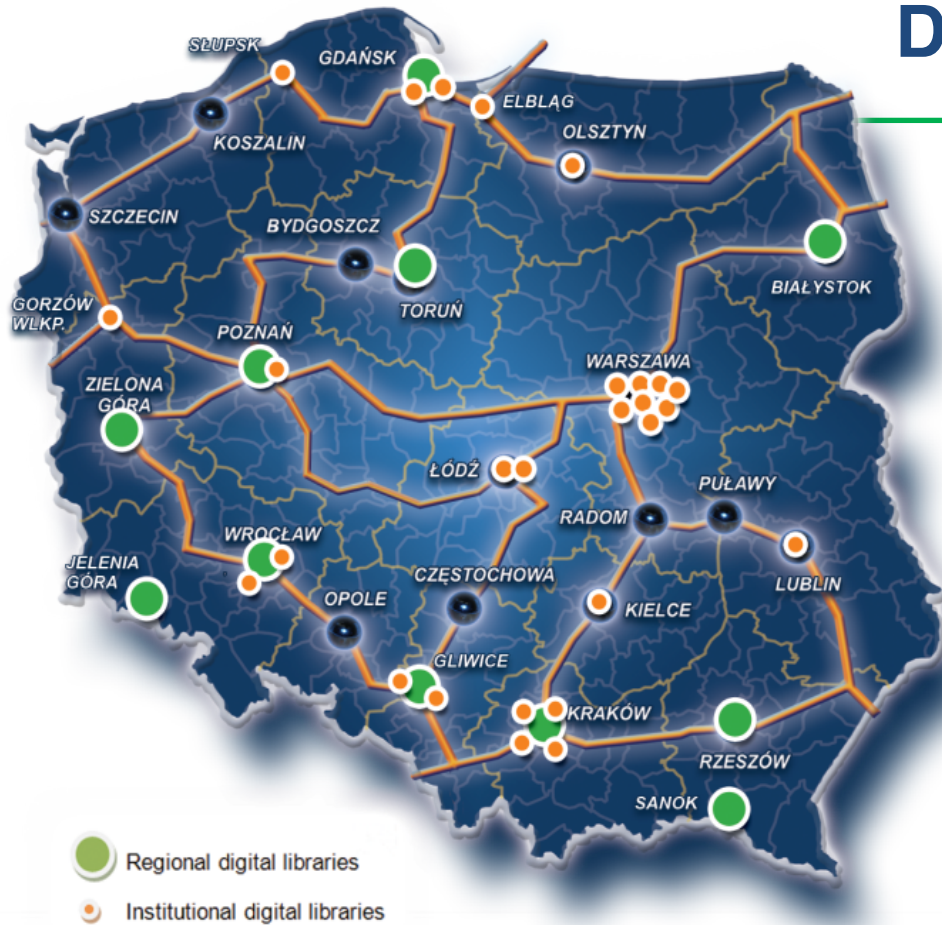

Added-value services in PIONIER NREN

-  HD Videoconference and services
-  Deployment of AAI & eduroam services
-  Applications on Demand for campuses
-  Archiving on Demand
-  Science HDTV and MOOC services

Digital libraries in PIONIER NREN

- ~ 100 digital libraries
- Several hundreds of cultural and scientific institutions
- 3 mln+ digital objects and growing...

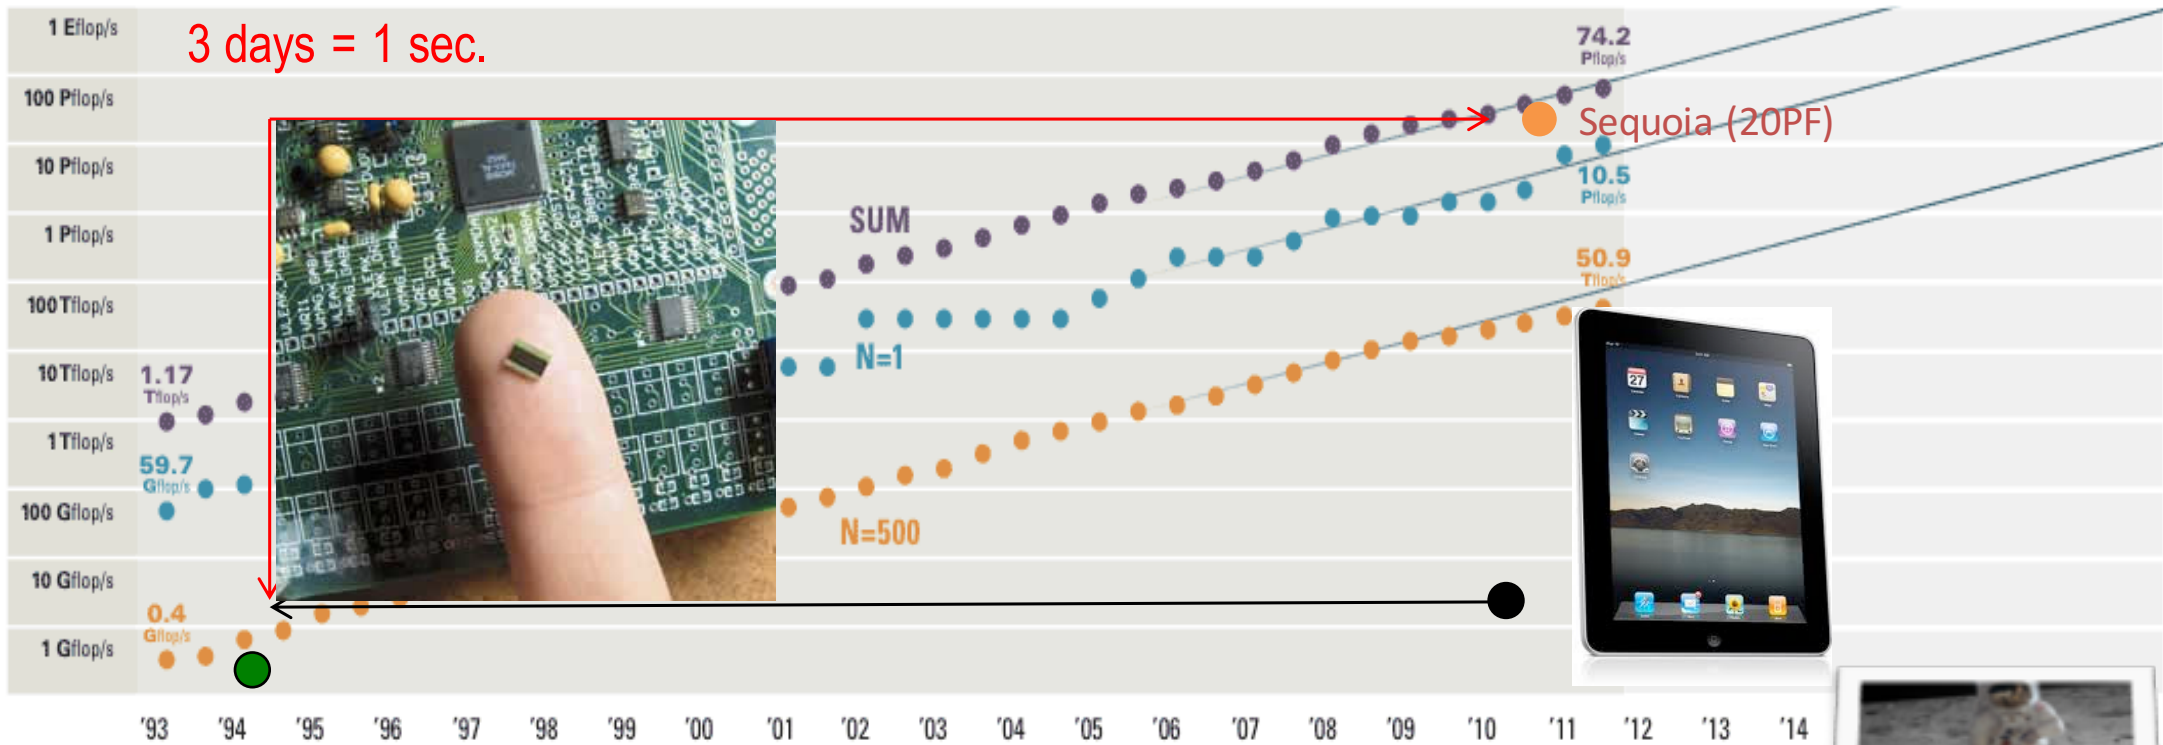

- Huawei systems based on Intel Haswell
- 1,4 Pflops, 80th Top500
- 1300+ nodes, 90K+ cores, Xeon E5 v3
- First Direct Liquid Cooling installation with Huawei systems
- Supports HPC (national & EU-wide in PRACE)
- HPC in the cloud (OpenStack)

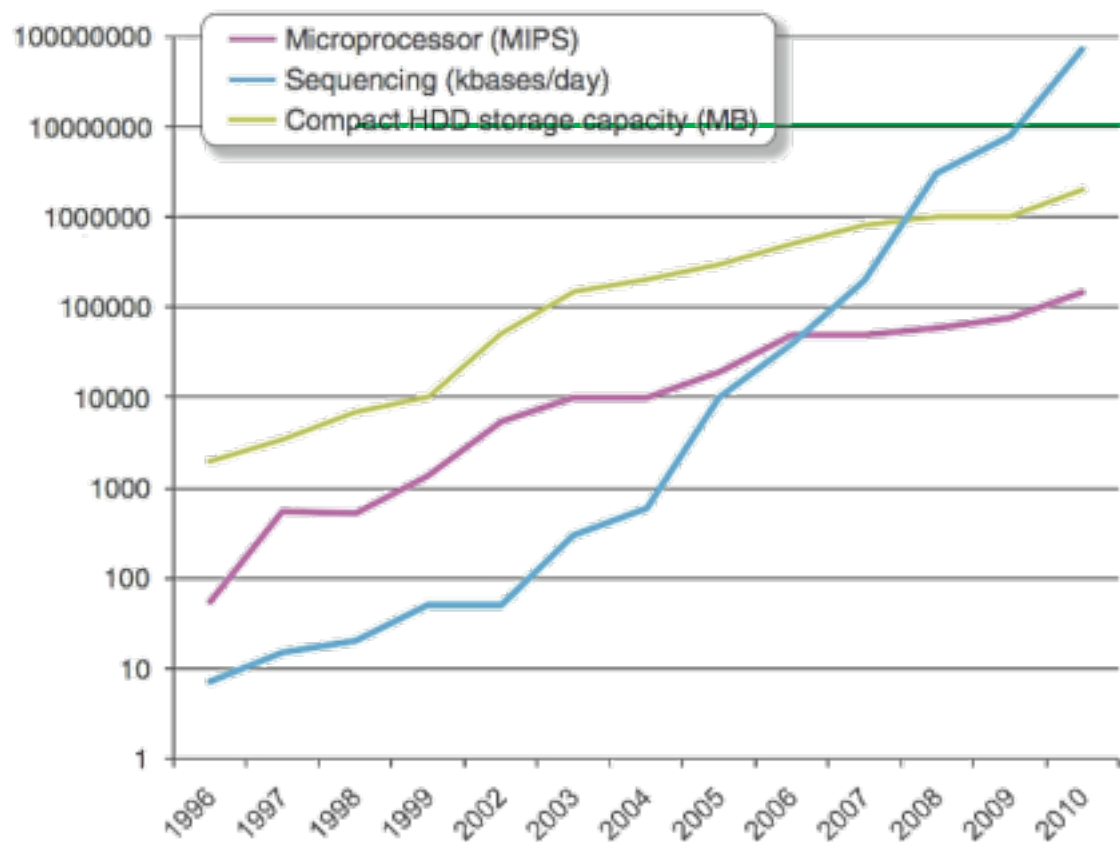

PERFORMANCE DEVELOPMENT

PROJECTED

~ Enough to send people to the moon in 1969!

Think about your data...

(1990) 20 years = 1000 pictures = 4GB

(2012) 6 months = 1000 picts + 1000 movies = 64GB

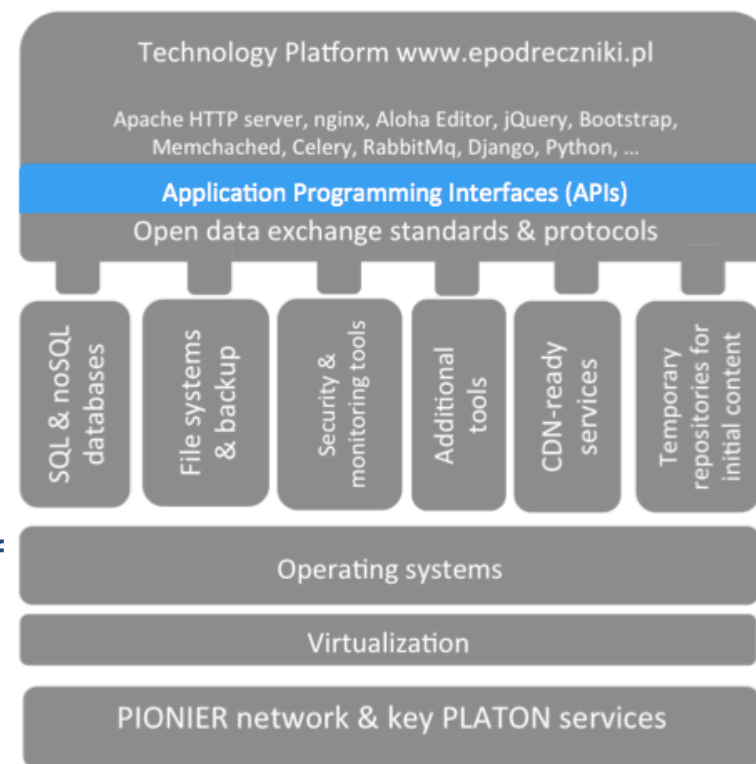

Open Educational Resources and e-textbook project

- Project supported by Ministry of Education, implemented in partnership with 3 selected Universities, one publisher and PSNC as technology and e-infrastructure provider (storage & computing facilities)
- All the resources available as OERs on CC-BY-... licenses to be used, re-used, modified, ...
- Project is constantly evaluated, testing resources are publicly available (surveys, interviews, click/eye tracking, comments, questions, ...) and will be extended...

Open Educational Resources and e-textbook project

- Services and OERs available now at www.epodreczniki.pl
- APIs and matadata schemas (english) <http://dev.epodreczniki.pl>
- UNESCO report on OERs in Poland <http://iite.unesco.org/pics/publications/en/files/3214727.pdf>

Open Educational Resources and e-textbook project

- Different data formats available to support thanks to the separation of data sources from presentation layers
- HTML5/JS/CSS3 for cross-platform support, no software to install and maintain
- Tested in various web browsers and HW
- Additional native apps for Android, iOS and Windows to synchronize on/off-line e-textbooks and personal notes
- Extensions possible to various edu service providers and cloud providers

Open Educational Resources and e-textbook project

- Improved accessibility for disabled users thanks to XML/XSLT schemas and transformations (**cnx.org** based)
- Additional metadata and alternative descriptions for the collected edu content to meet WCAG2.0 requirements
- The presentation layer tested on various specific reading devices for disabled users
- Ready for Braille support
